Teaching Parents The How-To's Of Daily Online Security & Safety

KOKS Final Thought 4 2day...

At the end of every show Bill gets the opportunity to improve KIDS lives with one **KOKS Final Thought 4 2day**. KOKS guests will have the opportunity to share with the audience their most personal thoughts on that day's subject.

This is one of my most favorite things to do, each week... because as you well know, when someone puts their mind to "IT" anything is possible!! and... WORDS have POWER!

Think and Grow Rich, is one of my favorite books and in this foundational success book are core principles. This one core principle is also one of the most overlooked success principles in our lives and that is "your mind has the power to change the world". KOKS guests are very sure of what they would do... and exactly what they would change, when they answer. Hopefully you find some of the Golden Nuggets of wisdom useful from all of our esteemed guests, and how they're making a real difference every day!

With over 470 interviews during the past 6 years I have had the opportunity to have listened to each one of these concerned parents, industry professionals, business and government leaders around the world. Each week I have tried to take what they have shared with me and what I have learned and developed from their wisdom is 4 Success Principles that Parents everywhere can use to create and sustain a cornerstone of communication with their children.

These are **The 4 KOKS Cornerstones** for happy kids & involved parents:

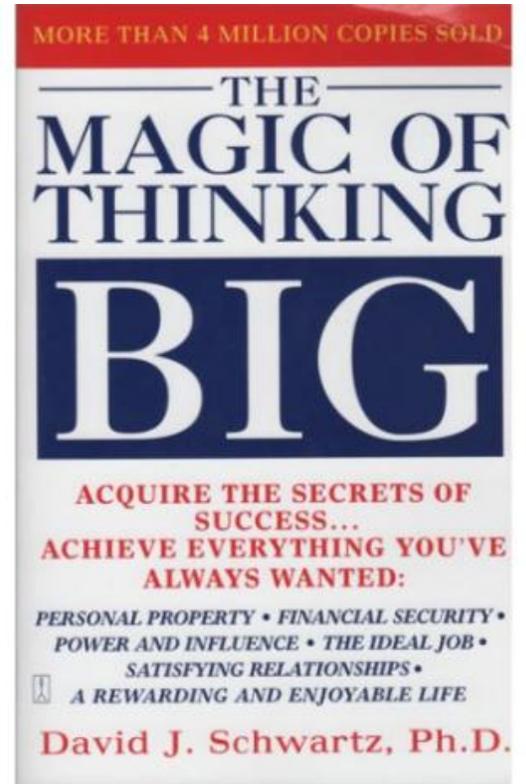

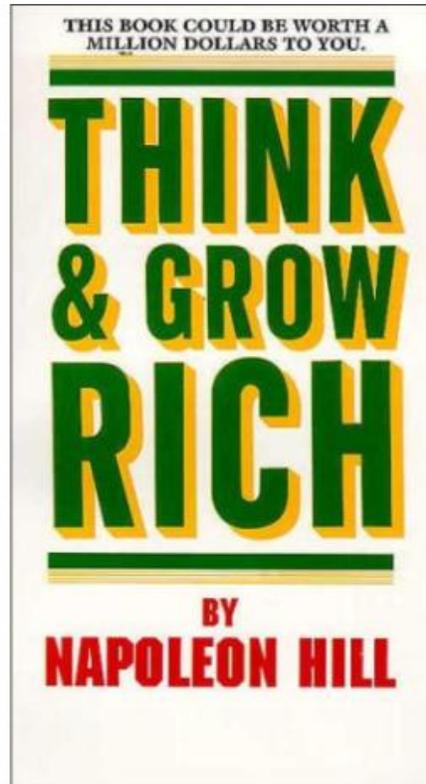

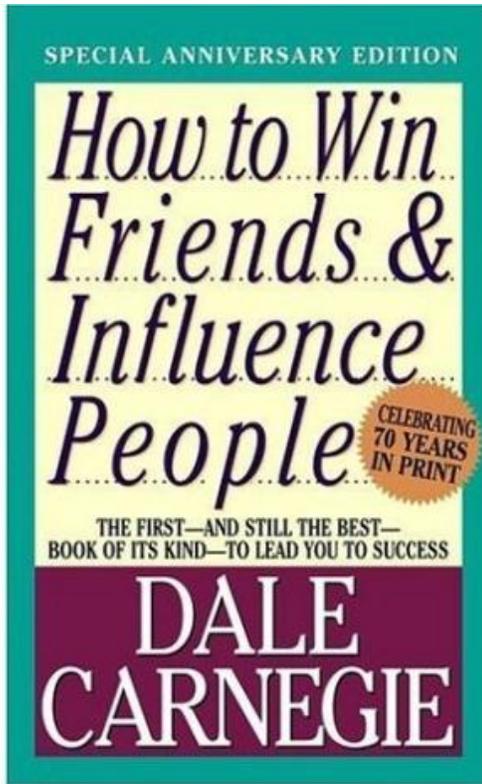

1. **Awareness** (U care)
2. **Communication** (listening)
3. **Teaching** (the best part)
4. **Action** (follow through)

Bill Wardell discusses and creates **Awareness** of the Internet security issues of the day relating to your children, family, business, & personal privacy. **Teaching** Parents the How-To's Of Daily Online Security & Safety so you can create **Action** plans that your family will be able to follow through with, to accomplish your families **GOALS** and online safety plan!!

The guests' answers are almost always the same, "**Communication Is Key**"!! Getting people to talk to one another and work towards a common goal seems simple enough, but therein lies the problem. Communication is what it takes to get started, and then having open discussions with your children to keep them safe!

Be Aware, Start Communicating and Join Bill Every Thursday Morning @ 11:00 am MST as we discuss Parenting in the year 2012 and beyond. Sometimes more importantly how we can improve on Keeping Our Kids Safe, and all the Internet Security Issues of the day relating to your children, families, homes, PC's and mobile communication devices...

How To Think And GROW Big!

There are 4 books that help layout important steps and ways of thinking that will enrich family life. These books can and should be read and shared with your KIDS if you want them to be successful young adults going to school, playing with friends and building healthy relationships with family member's. To go along with the four cornerstones, I recommend 4 books that parents should read as well as share with their children:

1. *How To Win Friends and Influence People*
2. *Think and GROW Rich*
3. *The Magic Of Thinking BIG*
4. Og Mandino, Wayne Dyer or Earl Nightingale it's a multiple choice, to pick one or pick one from each author!!

My favorite Og Mandino book is: *The Greatest Salesman in the World*

My favorite Wayne Dyer book is: *The Power of Intention -or- Excuses Begone*

My favorite Earl Nightingale is: *The Essence of Success*

You'll Be Glad You Did!!

The Greatest lesson I've learned, I learned at the age of 30:

I was 30 years old and didn't know that a very simple fact of life was that the books you read change your life! Especially a book like, "Think and Grow Rich". And, that the people you associate with shape who you are, and also help you to determine how successful you are going to be.

I've lived this thought for the past 20+ years BAdreamer and you will BANetMillionaire and now I say, "The value I place on myself is the value others will see in me!"

The principles and life lessons learned through these books will help prepare you and your kids for this new technology based world we live in. Don't kid yourself into believing that reading, manners, kindness and respect are not still IMPORTANT.

Overlooking the obvious that our kids are learning every day from our leaders, the media and especially the entertainment world that justice is a right, envy makes you stronger, revenge is OK, apathy is what everyone else is doing and why should I CARE is dangerous and detrimental to our kids potential.

One of the most important of these is the lack of respect for God, Country, Society & Family values. Teaching kids that just because they can get away with doesn't mean it won't hurt anyone because the one it hurts the most is themselves, then their families and then society.

Simple things like choosing a book or video, making new friends, and respecting their elders are very simple daily actions that will mold and shape them individually. Being aware and focusing on positive interactions is what will really make your families & KIDS dreams come true. The pursuit of TRUE happiness.

We hope you've enjoyed and learned from our blog, and if you have any questions... **Click IT: [To Contact Us](#)**
